

# WEATHER APPLICATION

This is a weather application which uses an API from OpenWeatherMap.

If you want to view the application without running it, below are some screenshots to exemplify the features.

The index page :

The sign up and log in pages:

The image displays two screenshots of a web application interface, both featuring a dark header with the text "Weather Application" and navigation links.

The top screenshot shows the "Sign Up Now" page. It includes a form with the following fields: Name, Last name, Email, Password, Re-enter the password, Country, and Town. A "Sign In" button is located at the bottom of the form.

The bottom screenshot shows the "Log In" page. It includes a form with the following fields: Email and Password. Below the form are two buttons: "Login" and "Delete".

The weather page :

The weather page after connection that shows the temperature in the user's current location when the location is turned on:

Weather Application

HomeChange Theme

### Weather

Enter a city name to get the current weather:

Get Weather

### Forecast

Current temperature near you  
9.64 °C, light rain

Make forecast for the desire city

Forecast

The user can search for the temperature in various cities and the results will be displayed in the second table, modifying it.
